

How to Run the MERN Stack Project

Step 1: Start the Frontend

1. Open your terminal or command prompt.

2. Navigate to the frontend folder:

```
cd frontend
```

3. Install the dependencies:

```
npm install
```

4. Start the frontend server:

```
npm run dev
```

Step 2: Start the Backend

1. Open a new terminal or tab.

2. Navigate to the backend folder:

```
cd backend
```

3. Install the dependencies:

```
npm install
```

4. Start the backend server:

```
npm start
```

Note:

- Ensure both frontend and backend servers run on different ports.
- Check that your .env files are correctly configured in both folders.
- Make sure MongoDB is running if your backend connects to a database.
